MORE MBI CRASHES

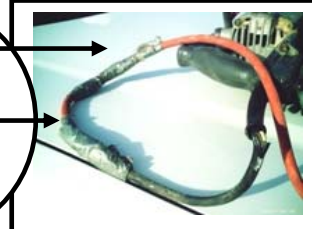

Every year since 1992, transportation accidents have been the leading cause of "on-the-job" **DEATHS** in the U. S. The driver of the vehicle on the right had to slam on the breaks at 5:30 in the morning on the Turnpike to avoid an even worse crash. The driver said, "... you never know when something can happen".

Exposed wires should be **REPAIRED**

NEVER use duct tape to repair a damaged cord

FORM PINS

Before the flying metal pieces cause an injury, form pins like this one should be given to our maintenance shop (Steven) for repair.

CELL PHONE USAGE

You can be written-up for making personal calls while working, unless you are on break. Never use a phone while operating heavy equipment and never make personal calls when driving an MBI vehicle.
